

TAC and Clipsal Combine Forces

Hilton Hotel – Adelaide, South Australia

The award winning Hilton Adelaide is situated 70 metres from the GPO, central to shopping, theatre and business districts. The hotel overlooks picturesque Victoria Square, adjacent to the vibrant Central Markets and surrounded by a myriad of cafes, bars and restaurants, just 5.5km from the airport. The hotel has 380 stylishly appointed rooms including deluxe business rooms for the discerning traveller and a newly designed Executive Floor with an exclusive Clubroom. 17 meeting rooms, including a pillar less ballroom, are available in a variety of combinations with a total capacity of 1500 guests.

TAC as a company has provided Open System for Building IT[®] solutions to Hilton Hotels around the world, like the Hilton at the Copenhagen Airport and the Hilton Hotel in Stockholm, Sweden – When the Hilton in Adelaide was refurbishing their own hotel they were looking for a leading edge solution – With TAC's proven track records at Lyell McEwen Hospital they saw TAC as a perfect partner – TAC saw the opportunity to align closely with Clipsal who were selected for the lighting solution for the Conference and Ball Room refurbishments.

TAC is providing a Structured Cabling backbone system for all voice and data including guest services such as TV and Internet facilities. Also included is the ability to provide intelligent environment control of the rooms. TAC as the System Integrator is providing the Total Solution as a Integrated Intelligence Package in conjunction with Clipsal

Engineering Solutions from Clipsal

Clipsal Datacomms

Clipsal Datacomms provides a complete end-to-end solution, with products catering to any type or size of installation. With solutions ranging from active equipment racks and enclosures, to Cat5, Cat5e, Cat6 and Fibre Optic products, Clipsal Datacomms provides high quality and comprehensive networking solutions to cater to the needs of both installers and end users alike.

Clipsal Integrated Systems

It is within this area that the complete range of Clipsal Integrated Systems' building automation products is developed, including the C-Bus Lighting Solution, HomeMinder Automation System, 5 Star Room Control System, and various electronic products developed for original equipment manufacturers (OEMs), together with the numerous software programmes that are required to commission, monitor and control these systems.

For Further information about this project please contact either Glen Scott or Bruce Dolman in our TAC Pacific South Australian branch.
